

Cory Environmental - Wandsworth

WAMITAB delivered Skills for Life Literacy programmes for Cory Environmental in London. Learners have taken part in weekly skills development sessions over a 20 week period and have achieved excellent results. These candidates were given two hours away from front line duties to undertake their training using WAMITAB developed contextualised learning material.

Feedback from the learners was really positive, with comments such as:-

“I can now think about going for a promotion as my reading and writing is much better”

“ I now have more confidence and want to learn more”

To celebrate their achievements, Cory Environmental held an Awards Ceremony, where WAMITAB Director General, Dr. Lawrence Strong awarded certificates to a number of successful candidates.

Dr Strong, said afterwards, “WAMITAB is always very pleased to celebrate the achievements of learners and see the Skills Development programme as a key plank for employees in the Waste Industry to up-skill and progress.”
